

HOW IT WORKS

From your artwork to the bar, and back.

Couriered UK-wide. Designs loaded before it ships. Bar or café staff run it from a touchscreen. Nobody from us is on site.

01

Book and send artwork

Quote first, then £150 holds the date. You send the files; we confirm they will read on foam.

02

We load and ship

Designs on the machine, ink fitted, and a card in the box for the bar or café team. DPD tracked, usually the working day before.

03

Print through the event

Bar or café staff run every print from the touchscreen, after one test print. Guests can ask for a design or a selfie. About ten seconds a drink.

04

Return via DPD Pickup

Pre-paid label in the box. Any Pickup shop within two working days. We check the machine and release the deposit.

What to send

PNG or JPG, at least 1000px wide, high contrast, transparent or white background. Prints render in monochrome sepia on cream foam. We review every file before dispatch and say if something won't read.

What arrives

The machine, ink fitted, your designs loaded, an in-box guide, and a pre-paid DPD return label. About 34 × 27 × 41 cm and ~13 kg, with a UK 13A plug. Place it near the bar.

On the day

At a busy bar expect about 30–40 prints an hour. The limit is staff choosing the design, not the print. A QR selfie uses the guest's phone signal or wifi — tell us if the venue is a basement. No wifi dongle in the box.

DRINKS

Stable foam only.

Soft or collapsing heads will not hold a print. We cannot print on lager, prosecco, wine, or anything without a stable foam head.

01

Coffee & lattes

Latte, cappuccino, flat white: the foam most guests photograph first.

02

Espresso martinis

Creamy cocktail foam holds a sharp logo or monogram.

03

Stout

A classic foam canvas when the bar is pouring dark.

04

Foamy cocktails & hot chocolate

Any stable head works. Soft foam that collapses will not.
